

## Linear performance guarantee 01.07.2014

There are a lot of good reasons to install a photovoltaic generator made by AxSun Solar. With our state-of-the-art production process and using high quality components we manufacture our highest quality modules. Due to consolidated knowledge, experience and our qualified staff you will get the best possible service through the whole process of consulting, planning and realization of your photovoltaic plant.

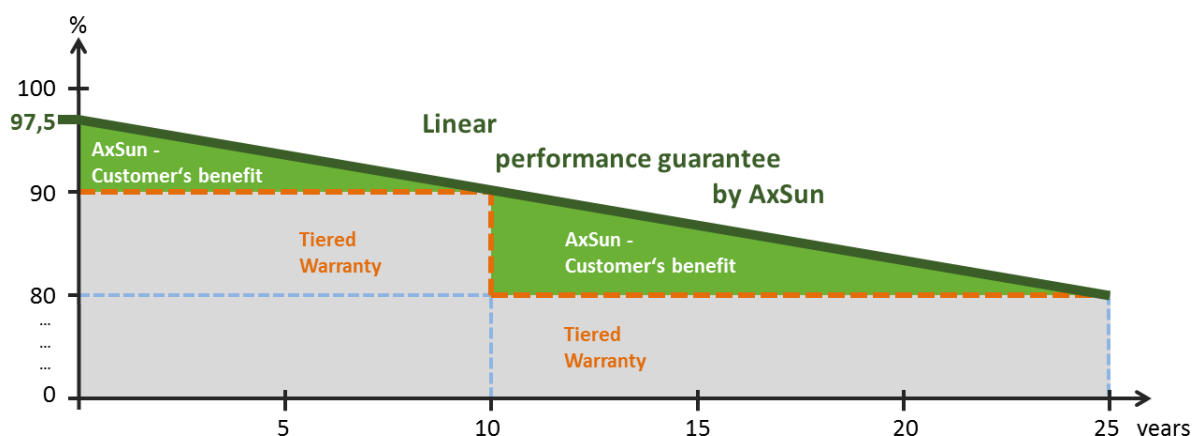

Nothing is as constant as change, particularly in the technics of photovoltaic. Therefore, it is important for us to continually go ahead with the development of our products.

Our staff are regularly trained, ensuring that the latest technical know-how always incorporates into the enhancements of our products. Thus, we have designed modules which are notable for their longevity, high quality workmanship as well as above-average performance.

Therefore, we offer our linear performance guarantee:

- **25 years linear performance guarantee**
- **15 years product gurantee**  
on premium and deluxe products with tempered safety solar glass
- **10 years product gurantee**  
on premium products with ARC tempered safety solar glass (anti-reflection coating)
- Performance guarantee of 97,5% in the first year
- Linear performance guarantee from the second year with a maximum output reduction of no more than 0,7% over a 25-year period
- AxSun guarantees 91,2% of the performance in the 10<sup>th</sup> year
- AxSun guarantees 80,7% of the performance in the 25<sup>th</sup> year

The following graph shows how obvious you get your profit out of the linear performance guarantee in comparison to the typical standards in line with the industry.
